Instructions:	Peel off and stick on any smooth surface

Inkjet White Static Cling:

Use this media to make professional looking, white, ultra removable labels or stickers. Ideal for clear interior window clings, or for white interior window clings when paired with a masking spray. Use our Ultra White material for any type of sign you wish to be self-adhesive and yet easily removable and reusable.

General Description:

This media is ideal for substrates such as mirrors, interior windows, or interior doors. Since our static cling relies strictly on static to adhere to the substrate there is no possibility of an adhesive residue being left behind once the cling is removed. Print out your text and images on this clear media, remove the cling from the liner, and apply it to surface.

Applications:

Static Cling works best for surfaces such as mirrors, windows or glass doors that have no exterior face, or interior painted metal surfaces. You can find our static cling in many hospitals, doctor's offices, and schools. Our static cling is much more aesthetically pleasing than taping signs to walls and doesn't leave screw or staple holes behind. Use this media to provide that critical extra bit of professionalism for your clients.

Disclaimer: We have tested our media in various personal inkjet printers with good results. The user of this paper/film must determine the suitability of this product before beginning production, using his equipment and method of application. The sellers and manufactures maximum obligation shall be to replace paper/film that has been found to be defective. Neither the manufacturer nor the seller shall be held liable for any injury, direct or consequential, arising out of the use of, or inability to use this paper/film.
