Decal Paper Type: Clear Laser Printer Bake On Decal Paper Water slide sticker Paper (Water decal paper).

Our water slide decal paper lets you use your color laser printer to create clear water slide decals limited only by your imagination. Thanks to the natural water fastness of laser print you can skip the fixative step you may have used when creating inkjet water slide decals in the past.

Clear water slide decals work best on a white or light colored substrate. This is due to the fact that laser toner is semi-transparent on a clear background, so a dark substrate will show through the decal film and overwhelm the print.

For creating decals for dark substrates please see our white color laser decal paper.

Laser Printed Bake-On Water Slide Decal Paper

Works in HP Desktop Color Laser Model 25XX, HP1518 and Minolta 2300W, and many others. Laser printer clear water-slide decals paper. Use HP 25XX or Minolta Laser printer. You can print on to the decal paper in the same way you would using any other photo quality paper. This paper is coated with special coating making it possible to create clear quality decals using just your HP or Minolta Laser printer. Note there is no need to use clear spray as is required when using inkjet decal paper. Simply print your ware slide decal using your desktop HP/Minolta color laser printer and you decal are ready for immediate use. For several years HPS has supplied small manufacturer with decal paper for wax candles, soaps, furniture, model replicas, also waterproof inkjet for organic shampoo bottles, clear ALPS printable self adhesive labels for wine bottles and so on. Many of our product are ideal for small manufacturing idea. We have several customers making an extra income using our media. We have customer that put wedding photos on large white oval candles. Small furniture manufacturer uses our PAS paper in their finishing process when applying finishing coat to children's furniture. Few custom makers of fishing rods also use our PAS paper.
