Penstick Classic (Digital) – Product information

PENSTICK *Classic* is a 150 µm static cling vinyl. **PENSTICK** *Classic* is available in different grades, series 3000 and 5000, which differ in printability and application for the sake of a different chemical formulation.

PENSTICK *Classic* comes with different release liners ensuring state of the art die cutting and converting. Customized grades, thicknesses, colours, are available on demand. One of these, series 6000, has been specially developed for the toy industry and complies with the newest and most demanding legislation.

Characteristics:

• removable without residues
• clings on smooth and glossy surfaces
• good adhesion on 3-dimensional surfaces
• versatile printability
• good die cutting charactersistics
• reusable

Applications:

• protection labels with print
• advertising labels

PENSTICK *Digital* is a vinyl cling film for digital inkjet printing. **PENSTICK** *Digital* can be printed with solvent, UV-cured and latex inks.

When printed with solvent inks **PENSTICK** *Digital* also ad- heres on the printed side. This makes it possible e.g., to apply advertising or decoration on the inside of a storefront.

Characteristics:

• Adheres without adhesive to smooth, glossy surfaces
• Removable without leaving any residue
• Reusable

- Adheres on both sides (also on the printed side – solvent inks only)
- Good UV resistance; no color fading

Applications:

PENSTICK *Digital* is for example perfectly suited for temporary or long-term storefront decoration or advertising. The clear mat film has an effect of etched glass and could be used e.g. as blinds.
